Headset

HQ2 Camera Headset

As used by UK police forces. This is the most comfortable headset we have ever worn. It's got to be the best way to head mount your camera if you are not wearing a helmet and do not want to wear a headband strap. Very light-weight and feels just like wearing a pair of sun glasses.

ONLY compatible with the HQ2 bullet camera.

CamEye LANC Remote Control

LANC Remote controller

Remote control of start/stop recording and power on/off

This remote makes using the HQR-2 recorder so simple. One button does it all with an LED to tell you what the recorder is doing.

Comes with a 1m cable which can easily be extended up to 10m.

Additional Battery Pack

12v 8400mah Li-ion power pack.

Use this battery pack to add at least 5 more hours record time to your HQR2 recorder (depending on which bullet camera is being used)

Supplied with a UK mains charger and DC Connecting cables.

Small, pocket sized: 100 x 70 x 20mm 170grms.

External Microphone

External Stereo Microphone

The HQR-2 has a built-in mono mic (in the recorder). If you want external stereo audio for higher quality sound recording then this mic plugs directly in to the audio input jack of the HQR-2.

Supplied with a small crocodile clip for securing the mic in place.

Gain control is still functional in the menu system of the HQR-2 when using this microphone.

Suction Mounts

Suction Mount

This is the best way to secure your camera to a hard hat. These suckers suck hard at speeds of over 185 mph (on a track of course). Zinc bonded to steel silver clips that will never rust. You will require 3 suckers which is the minimum recommended for holding a bullet camera.

DVR Recorder Belt Pouch

Protective HQR-2 Pouch

This padded velcro pouch will provide extra protection for your HQR2 recorder. It has velcro straps at the rear that can be used around a belt.

DVR Recorder Arm Pouch

Neoprene Armband for HQR2

You can now wear your HQR2 professional quality digital video recorder on your arm like an IPOD! Comes with a long arm strap for use over ski jackets down to cycling tops. Has a clear protective screen so you can see the LCD and operate the device.

Extension Cables

1m - 10m Extension Cables for HQ Bullet Camera

Our new range of extension cables available for Sony HQ bullet cameras. These all have waterproof connectors that will work down to 3m of water. You can connect as many of these cables together in any combination up to a length of 50m without losing video quality.

Camera Phono & DC Power Cable

Phono and DC power cable for HQ camera

We supply this cable with all of our HQ bullet cameras. You can purchase this as a spare. Simply put this connector of the end of any of the extension cables above to give you standard RCA phono and DC input and outputs.
