

Portable Broadcast Quality Recording System

Camera can be worn as a head cam or can be attached to a hard hat thereby facilitating hands free recording, DVR attaches to a belt or can be worn on the arm. Camera power is derived from the DVR keeping cables to a minimum.

Records up to 5 hours of high quality video from one full charge.

Camera...

The Sony HQ2 camera uses a SuperHADII CCD with NeXT Chipset which resolves to over 550tvl. This new chipset gives excellent low light capabilities with a reduction in overall size.

Digital Video Recorder (DVR)...

A device that can record at full 720 x 576 resolution, 25fps and 8mb/s. There are other recorders available that can do this but at the moment, this is the only one with a built-in colour screen!

The HQR2 is a micro pocket DVR that records high quality D1 video to a CF card up to 32gb in size. A 32gb card will hold around 8 hours of video at full quality.

Wireless Operation...

Transmit video in real time via the 2.8GHz radio link.
